

SCIENCE WEEK

Science Week Activities

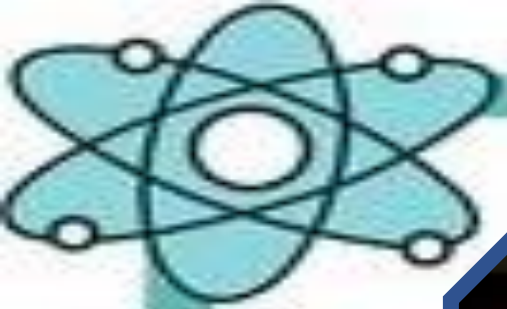

The science week was celebrated virtually at GIIS by our primary students from 28th July~ 3rd July. The aim of celebrating this week was to enhance the understanding of science amongst the students and also to display the fun side of it. The activities conducted on account of science week aimed to help the children develop interest towards science as a subject.

Students participated in these activities with great curiosity and interest. Ultimately the session ended with great zeal of innovation of the young buddies stepping towards more experimental exploration.
