

HYDERABAD

April 22, 2021 marks the 51st anniversary of Earth Day. We have been celebrating this event since many years, but this year was different. GIIS geared up to celebrate it online. This in no way dampened the high spirits of our Science teachers. They were as enthusiastic as ever, and took up the challenge of celebrating it online. The theme for Earth Day 2021 was 'Restore the Earth'. Few activities were planned. Among all, the ones that stood out were the 'book mark' and 'fridge magnet' making activity. The children loved this activity as it could be done using materials available at home. Children did their best with whatever materials were available and made beautiful fridge magnets and book marks. All in all, the activity was a success. They got an opportunity to display their talent and nurture their young minds.
