

GIIS had organized a fun-filled virtual summer camp for the students of grades I to VI. It was an eight-day long program from 3rd May 2021 to 12th May 2021. In which the teachers engaged the children in a variety of activities. Each day was different from the previous day as none of the activities were repeated.

The children of grade 4,5 and 6 had great fun in 'LITERARY TIME'. Activities like Quiz, based on English language, was conducted for the students. Drawing a family tree was another activity done by the children. This provided a wonderful tool to help them visualize how each member fits into the family. Memory games and Correct me if I am wrong, were played and enjoyed. The children were excited to the core and they enjoyed each and every activity.

Talking about Science, we had something called, 'INNOVATION DAY'. This was an initiative to bring awareness among the children about the fact that 'science is fun'. On this day, the children performed Experiments on Density and Air Pressure. The students also participated in making Eco Friendly Clay with the help of biodegradable materials such as all purpose flour, salt, oil, turmeric and water. It was very satisfying to see the excited faces of the children.

'PUZZLE TIME' was organized for all the primary grade children. It was a fantastic opportunity for them to explore and learn new mathematics beyond the confines of a classroom which they don't get a chance to experience in a normal lesson. One of its kind was Lattice Multiplication in which the children were given only 15 minutes to solve. It was heartening to find most of the children were able to complete it in time. This activity helped children think out of the box and improved their problem-solving skill.

GIIS had also organised 'Yoga Day' and 'Dance Time'. In Yoga the children started with 10 minutes of meditation followed by immunity building asanas. The session ended after performing NadiShuddhi pranayama. In Dance time the children were taught basic steps of western dance. It was so nice to see other family members also joining them.

It gave us(teachers) immense satisfaction to see the children thoroughly enjoy this first of its kind virtual summer camp.
